

SimplifAI Property Assets

Client walkthrough — pages and main features

Prepared for client review meeting

July 2026

Abstract

This document describes the current prototype of **SimplifAI Property Assets** in plain language. It explains what each screen is for, what you can do there, and how the main workflows fit together. Technical implementation details are intentionally omitted.

1 Introduction

SimplifAI Property Assets is a web application for managing property-related money flows: owner **deposits** (income), property **expenses** (costs), and the checks needed to keep both accurate.

The application is organised around a simple idea: every transaction belongs to a **property**, and every property belongs to an **owner**. The sidebar on the left is the main way to move between sections.

Figure 1: The main layout: sidebar navigation on the left and the active page on the right. Use **Dark/Light** at the top of the sidebar to switch appearance.

1.1 Main sections at a glance

2 Dashboard

The **Dashboard** is the starting point. It answers: “How are we doing right now?”

2.1 Period filter

At the top you can choose **Month**, **Quarter**, or **Year**, and pick the year (and month or quarter anchor). Most numbers on the dashboard follow this period — deposits, expenses, gaps, owner totals, and recent activity.

Menu item	Purpose
Dashboard	Overview of finances, alerts, and property health for a chosen period
Properties	List of managed properties and basic financial totals
Owners	View owners and how their properties perform together
Transactions	All deposits and expenses; add records or import from files
Alerts	Items that need review or correction
AI Query	Ask questions about your data in everyday language

Table 1: Navigation menu

2.2 Quick actions

Four shortcut buttons let you jump straight to common tasks:

- **Import file** — upload a spreadsheet or document on the Transactions page
- **Add expense** — open the manual expense form
- **View alerts** — open the Alerts page (shows a count if anything is open)
- **Ask AI** — open the AI Query page

2.3 Summary cards

The top row of cards shows, for the selected period:

- Total **deposits** and how many deposit transactions
- Total **expenses** and how many expense transactions
- **Net position** (deposits minus expenses)
- Total **transactions**
- **Open alerts** (errors and warnings)
- **Missing deposits** — expected owner deposits not found in the period

Figure 2: Dashboard top section: period selector, quick actions, and summary cards.

2.4 Pending uploads and alerts at a glance

Two panels side by side:

- **Pending uploads** — files that were uploaded and analysed but not yet confirmed
- **Alerts at a glance** — the most important open alerts; click any row to go to Alerts

2.5 Property health

Each property appears as a card showing deposits, expenses, net, and a **deposit status** badge:

- **On track** — the expected monthly deposit was found for the period
- **Partial** — some months in the period are missing (quarter/year view)
- **Missing** — the expected deposit was not found

Note: Deposit status compares **expected monthly amounts** (configured per property) against **actual deposit records** in the system. It does **not** depend on whether a file was uploaded — only on confirmed deposit entries.

Figure 3: Property health cards showing deposits, expenses, net, and deposit status.

2.6 Other dashboard sections

- **Expense breakdown** — bar view of spending by category (utilities, maintenance, tax, etc.)
- **Missing expected deposits** — table of properties where the monthly deposit was not received
- **Owner overview** — per-owner deposits, expenses, and net for the period
- **Recent activity** — latest deposits and expenses in the selected period

Figure 4: Optional full-page screenshot showing the complete dashboard (may require a tall capture or stitched image).

3 Properties

The **Properties** page lists every managed property.

For each property you typically see:

- Property name and address
- Owner name
- Deposit count and total deposit amount
- Status (e.g. active)

Click a property row to see more detail on the right (owner information, linked bank accounts, and recent deposits).

The screenshot shows a web application interface for property management. On the left, a table lists three properties: Dizengoff 45, Herzl 8, and Rothschild 12. Each row shows the owner's name, the number of deposits, the total amount, and the status. On the right, a detailed view for 'Rothschild 12' is shown, including the owner's name (David Cohen), linked bank accounts (Bank Leumi), and a list of recent deposits with dates and amounts.

Property	Owner	Deposits	Total	Status
Dizengoff 45	David Cohen	9	₪45,750.00	Active
Herzl 8	Sarah Levi	6	₪24,300.00	Active
Rothschild 12	David Cohen	7	₪49,700.00	Active

Rothschild 12
12 Rothschild Blvd, Tel Aviv

Owner
David Cohen

Bank Accounts
Bank Leumi
12-345-678901

Recent Deposits

- ₪6,000.00
04/07/2026 - Owner deposit - July
- ₪8,500.00
05/06/2026 - Owner deposit - June
- ₪8,500.00
05/04/2026 - Owner deposit - April
- ₪8,500.00
05/03/2026 - Owner deposit - March
- ₪1,200.00
15/02/2026 - Repair reimbursement
- ₪8,500.00
05/02/2026 - Owner deposit - February
- ₪8,500.00
05/01/2026 - Owner deposit - Jan

Figure 5: Properties page: list on the left, selected property details on the right.

4 Owners

The **Owners** page groups information by property owner.

The main table shows, for each owner:

- Number of properties
- Total deposits and expense totals (all time in the current prototype)
- **Net** position across their portfolio

Selecting an owner reveals a breakdown of each property they own, with deposit and expense totals per property.

5 Transactions

The **Transactions** page is where day-to-day financial records live. Deposits and expenses appear together; deposits are highlighted in **green**, expenses in **red**.

5.1 Filter tabs

- **All** — deposits and expenses combined, sorted by date
- **Deposits** — income only
- **Expenses** — costs only

Additional filters: property, owner, date range, and (for expenses) category and source.

Figure 6: Owners page with summary table and property breakdown for the selected owner.

5.2 Summary cards

Four cards at the top show total deposits, total expenses, net, and how many rows match the current filters.

5.3 Add expense (manual)

Click **Add expense** to enter a single expense by hand: property, date, amount, category, source, payment method, and optional description.

Transactions
View deposits and expenses together. Deposits are highlighted in green, expenses in red.

Import from file Cancel Export CSV

- Total deposits:** ₪119,750.00 (22 transactions)
- Total expenses:** ₪5,720.50 (7 transactions)
- Net:** ₪114,029.50 (Deposits minus expenses)
- Showing:** 7 (7 matching transaction(s))

All Deposits Expenses

New manual expense

Property: Select property Date: mm/dd/yyyy Amount (ILS):

Category: maintenance Source: manual company Payment method: company account

Description:

Save expense

Figure 7: Transactions page with the manual expense form open.

5.4 Import from file

Click **Import from file** to upload:

- Excel or CSV spreadsheets
- PDF documents
- Images (receipts, invoices)

Steps:

1. Choose the **property** and **transaction type** (deposit or expense)
2. Select the file

3. Click **Analyze file** — the system reads the file and proposes rows to save
4. Review the table: yellow warnings mean “please verify”; red means a field must be fixed
5. Click **Confirm** to save approved rows

Figure 8: Import panel: file selection, analyse step, and review table before confirming.

5.5 Deposit spreadsheet format

When importing **deposits**, the Excel file should include at least:

Column	Example
account_number	12-345-678901
transaction_date	2026-07-05
amount	8500.00
currency	ILS (optional)
reference	DEP-2026-018 (optional)
description	Owner deposit - July (optional)

Table 2: Deposit import columns

The account number links each row to the correct property automatically.

5.6 Expense spreadsheet format

When importing **expenses**, select the property in the upload form, then use a file with at least:

Column	Example
transaction_date	2026-07-08
amount	445.00
category	utilities
source	standing_order
payment_method	bank_direct_debit
vendor_name	Israel Electric Corp (optional)
description	July electricity bill (optional)

Table 3: Expense import columns

5.7 Export

Export CSV downloads the currently filtered transaction list for use in Excel or reporting.

Type	Date	Property	Owner	Details	Amount	Description
Deposit	18/07/2026	Dizengoff 45	David Cohen	12-345-678901	+\$950.00	Parking fee reimbursement
Deposit	10/07/2026	Dizengoff 45	David Cohen	99-888-777001	+\$4,800.00	Owner deposit - July
Expense	06/07/2026	Herzl 8	Sarah Levi	management fee - manual company	-\$100.00	Management fee for plumbing
Deposit	05/07/2026	Rothschild 12	David Cohen	12-345-678901	+\$6,000.00	Owner deposit - July
Deposit	05/07/2026	Dizengoff 45	David Cohen	12-345-678901	+\$8,500.00	Owner deposit - July
Deposit	05/07/2026	Dizengoff 45	David Cohen	12-345-678902	+\$6,200.00	Owner deposit - July
Deposit	05/06/2026	Rothschild 12	David Cohen	12-345-678901	+\$8,500.00	Owner deposit - June
Deposit	10/05/2026	Herzl 8	Sarah Levi	99-888-777001	+\$4,800.00	Owner deposit - May
Deposit	10/04/2026	Herzl 8	Sarah Levi	99-888-777001	+\$4,800.00	Owner deposit - April
Deposit	05/04/2026	Rothschild 12	David Cohen	12-345-678901	+\$8,500.00	Owner deposit - April
Deposit	05/04/2026	Dizengoff 45	David Cohen	12-345-678902	+\$6,200.00	Owner deposit - April
Deposit	25/03/2026	Herzl 8	Sarah Levi	99-888-777001	+\$300.00	Insurance refund
Deposit	10/03/2026	Herzl 8	Sarah Levi	99-888-777001	+\$4,800.00	Owner deposit - March
Deposit	05/03/2026	Rothschild 12	David Cohen	12-345-678901	+\$8,500.00	Owner deposit - March
Deposit	05/03/2026	Dizengoff 45	David Cohen	12-345-678902	+\$6,200.00	Owner deposit - March
Expense	05/03/2026	Dizengoff 45	David Cohen	utilities - standing order	-\$310.00	Municipal Water — Water utility standing order
Deposit	15/02/2026	Rothschild 12	David Cohen	12-345-678901	+\$8,500.00	Deposit reimbursement

Figure 9: Transactions table showing mixed deposits and expenses with filter controls.

6 Alerts

The **Alerts** page collects items that need attention.

6.1 Types of alerts

- **Missing deposit** — expected monthly deposit not found; you can add the deposit and resolve the alert
- **Upload review** — a file was uploaded but not yet confirmed
- **Possible duplicate** — a deposit may already exist; you can skip or confirm

6.2 Working with an alert

1. Click an alert in the list on the left
2. The fix panel on the right shows what to do:
 - For missing deposits: fill in bank account, date, and amount, then save
 - For uploads: edit extracted rows, skip duplicates if needed, then confirm
3. Alternatively, click **Dismiss** if the alert does not require action

The Alerts menu item shows a **red count badge** when open alerts exist.

7 AI Query

The **AI Query** page lets you ask questions about your data in natural language, for example:

- “Total deposits for Rothschild in Q1 2026”
- “Which properties had no deposit in March 2026?”
- “Show electricity expenses for Dizengoff”

Alerts
Review missing deposits and uploaded files that need attention. Click an alert to fix it.

Description
Manual entry for expected 2026-07 deposit

Add deposit & resolve

Dismiss alert

Figure 10: Alerts page: alert list on the left, resolution form on the right.

The answer appears as readable text plus a results table when applicable. You can export results to Excel from this page.

Example prompts are shown on the page to help you get started.

AI Query
Ask natural-language questions about deposits and expenses. Uses rule-based parsing by default; set LLM_API_KEY for OpenAI-powered parsing.

Show all deposits for Rothschild 12 in Q1 2026 Which properties had no deposit in March 2026? Total deposits per owner this year What were the electricity expenses in January 2026? Total expenses per property this year

How many expenses were recorded in 2026?

Show all deposits for Rothschild 12 in Q1 2026 above 5000

Ask

Answer
Found 3 deposit(s) matching your query. Filtered to amounts >= 5000.

Figure 11: AI Query: question input, example prompts, answer, and results table.

8 Typical workflows

8.1 Recording a new month of owner deposits

1. Prepare an Excel file with deposit rows (see Section 5)
2. Go to **Transactions** → **Import from file**
3. Choose type **Deposit**, select the file, analyse, and confirm
4. Check the **Dashboard** — property health should show **On track** for properties that received their expected deposit

8.2 Recording property expenses

Either:

- Use **Add expense** for a single manual entry, or
- Use **Import from file** with type **Expense** (one upload per property)

8.3 Clearing alerts

Open **Alerts**, work through each item, then confirm the dashboard alert count drops to zero.

9 Demo upload files (for testing)

Sample files for manual testing are provided in the project folder: `data/seed/client_demo/`

File	Use for
client_demo_deposits_july2026.xlsx	One deposit import (all properties)
client_demo_expenses_rothschild_july2026.xlsx	Expense import — Rothschild property
client_demo_expenses_dizengoff_july2026.xlsx	Expense import — Dizengoff property
client_demo_expenses_herzl_july2026.xlsx	Expense import — Herzl property

Table 4: Demo upload files supplied with the prototype

10 Current scope and next steps

This prototype focuses on:

- Viewing and filtering deposits and expenses
- Importing data from files with a human review step
- Detecting missing expected deposits
- A central alerts workflow
- Natural-language queries over financial data

After the client meeting, feedback may lead to new requirements — additional reports, document storage, notifications, user roles, Hebrew interface, and other items discussed in the full product vision.
