How to use the app — visual guide

July 2026

Short picture guide for everyday use. Each section is mostly a screenshot — add your own captures where shown.

Tip: Capture the full page (or the main panel). Prefer light mode for printing.

1. Finding your way around

Use the menu on the left to open each page.

Figure 1: Sidebar menu — click a page name to open it.

2. Dashboard — the overview

Start here. Pick a period (month / quarter / year), then read the totals.

Figure 2: Period picker, quick buttons, and summary cards.

Property health at a glance:

Figure 3: Each property: deposits, expenses, and status.

Full dashboard (optional tall capture):

3. Properties

Your properties list. Click a row to see details on the right.

Figure 5: Properties list + detail panel.

4. Owners

Owners and their totals. Click an owner to see their properties.

Figure 6: Owners table + selected owner breakdown.

5. Transactions — the ledger

All money in and out. Filter, search, edit, import, and export here.

The screenshot shows a transaction list interface. At the top, there are filters for Property (All properties), Owner (All owners), From date (mm/dd/yyyy), To date (mm/dd/yyyy), Category (All categories), and Source (All sources). Below the filters is a table with columns: Type, Date, Property, Owner, Details, Amount, and Description. The table contains 18 transactions. Deposits are highlighted in green, and expenses are highlighted in red. The transactions are as follows:

Add one expense by hand:

The screenshot shows the 'Transactions' section with a summary of deposits and expenses. Below the summary is a form to add a new manual expense. The form includes fields for Property, Date, Amount (ILS), Category, Source, and Payment method. The 'Category' is set to 'maintenance' and the 'Source' is set to 'manual company'. The 'Payment method' is set to 'company account'. There is a 'Save expense' button at the bottom.

Import from a file (Excel / PDF / image): choose file → analyze → review → confirm.

Export: use **Export CSV** for Excel. Hebrew text opens correctly in Excel.

Filters: Type, Prop ID, dates, owner, source file — same idea as your Excel columns.

Transactions
Same ledger as your Excel: Prop ID, Date, Section, Notes, Amount, and Balance — plus Property and Owner for easier browsing. Newest dates first; rows without a date appear at the end. Incomplete imports (missing date/amount) stay in Alerts until fixed or dismissed. He/She paid and rental income are marked like in the spreadsheet.

7. Data import

Bulk client / Excel data import (when you load a full workbook).

Data import
Upload the ClientData Excel files to load owners, properties, expenses, and deposits — the same pipeline as the offline seed import. Large imports run in the background so the request does not time out.

Current database
34 owners · 58 properties · 2 bank accounts · 9043 expenses · 1362 deposits

Upload files
Required files rebuild the core ledger. Optional bank and credit-card files match the full seed set.

8. AI Query — ask in plain language

Type a question. Read the answer. Open matching rows in Transactions if you want.

AI Query

Ask natural-language questions about deposits and expenses. Uses rule-based parsing by default; set LLM_API_KEY for OpenAI-powered parsing.
